

INPUT

sum the array including
the string values in the
array

FUNCTION

1. //function statement named sumMix
with parameter x

2. //return x property of map with parameters a fat arrow
+a[this turns
//any string in my array in to a number[+ in this case is
unary plus]
//then reduce method with an accumulator and a current
fat arrow
//acc + cur, and a 0 as the starting value of acc
//[this adds all the values in my string]

OUTPUT

2,2,'2',1=7
